

PTC 903

Activator / Oxygen Bleach Additive

CLEANING SOLUTIONS FOR THE HEALTH OF YOUR BUSINESS.

PTC 903

Activator / Oxygen Bleach Additive

PTC 903 turns oxygen bleach into high performance oxidizing brighteners and stain removers that are safe on white and colored textiles. It allows for controlled release of oxygen bleaching agents at lower temperatures, resulting in energy savings. This technologically advanced and unique process is only available from Sunburst Chemicals. No other chemical supplier has this technology or process for enhanced oxygen bleaching.

Activator and oxygen bleach can eliminate the bleach step or operation. The chemistry performs its whitening, brightening, and stain removal during the wash step or operation, which further saves water and energy.

Activator added to the oxygen bleach in the wash bath generates peracetic acid in that bath, with all the benefits associated with peracetic acid.

Activator with oxygen eliminates permanent medicine staining in healthcare wash processing, which significantly reduces rag outs. Eliminates brown permanent stains caused by chlorhexidine antimicrobials.

Reduces linting of cotton textiles by up to 65%, which reduces the replacement cost significantly.

Activator delivers superior results to any other bleaching or stain removing process available.

Delivers lower overall operation costs to any laundry.

U.S. patent #8,858,650

PACKAGING:

55 gal drum (#793055)

PROPERTIES:

Color - Amber	Fumes - None
Fragrance - none	Flash Point - none
pH - 12.0-14.0	Corrosive Factor -
Hard Water Tolerance - Fair	Non-Corrosive
Rinsability - Excellent	Shelf Life - Indefinite

BAR CODE & CUBE INFORMATION:

Dimensions - 24 x 24 x 35
Weight - 527
Cube - 11.667
PKG/Layers - 4
Layers - 1
Pallet - 4
Hazardous - No
UPC Code - 784331793076

SAFETY:

Read label carefully before use. For industrial and institutional use only. Keep out of reach of children. Harmful if swallowed. Causes skin irritation. Eye contact causes serious eye irritation. For further information, consult the Safety Data Sheet.

DIRECTIONS FOR USE:

Add PTC 903 at the same time or slightly before the hydrogen peroxide in the bleach cycle.

Your Sunburst Representative will set the dispenser to deliver the appropriate amount.
